

THE NEW **SOMIC 434**
THE DIRECT LINE TO SHELF-READY

Opens up new dimensions in flexibility, efficiency and ergonomics

You want your products to be displayed in an attractive manner?

Our packaging machine customizes exactly to your requirements

The new SOMIC 434 packs your products quickly and reliably in secure shipping cardboards and cartons. When they arrive at the retailer, the goods are also attractively displayed on the shelves.

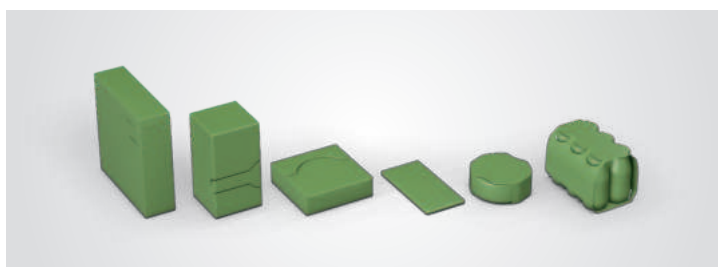

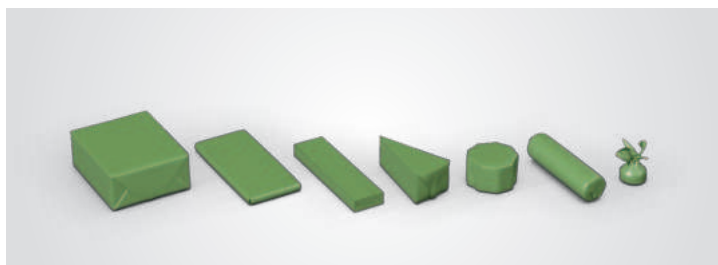

We are the experts for a wide range of packaging tasks. Our cartoning machine produces secondary packaging for:

- flat sachets, stand-up pouches
- paperboard cartons
- cans, cups, dishes
- jars, bottles, tubes
- blister packs

Thanks to a well-thought-out concept that is technically perfectly implemented, we ensure that until they reach end customers at the point of sale, your products

- are reliably and hygienically protected
- can be easily and securely transported
- are professionally displayed on the retailer's shelf with strong branding
- are very easy to handle for everyone involved
- are packaged in sustainable and recyclable material

This commitment ensures our solution targets all quality-conscious industries with individual packaging requirements: from the food, pet food, and pharmaceutical sectors to many other demanding non-food products. The flexible design of our packaging machines enables us to adapt to changing market requirements at all times.

One machine for all packaging needs: Individually grouped in one- and two-piece cartons

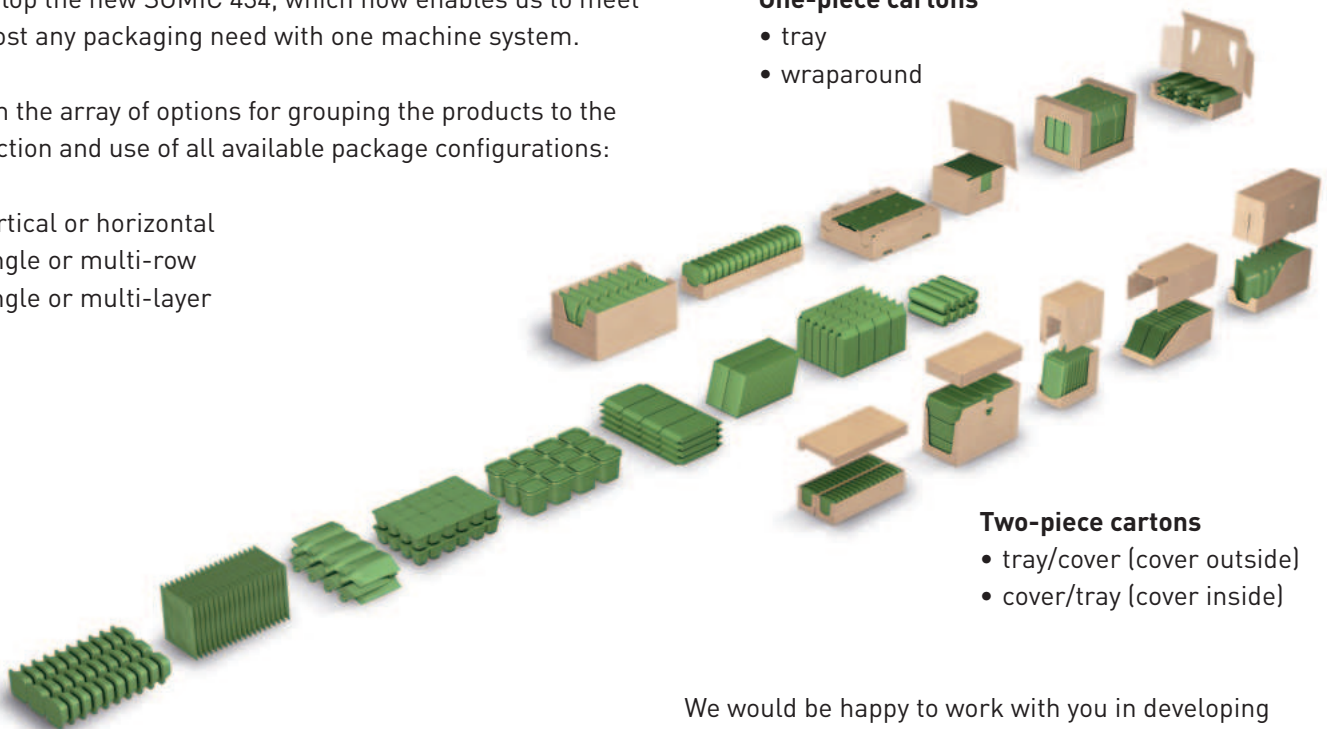

For 50 years, SOMIC has stood for high-tech packaging engineering. All this experience has been drawn upon to develop the new SOMIC 434, which now enables us to meet almost any packaging need with one machine system.

From the array of options for grouping the products to the selection and use of all available package configurations:

- vertical or horizontal
- single or multi-row
- single or multi-layer

One-piece cartons

- tray
- wraparound

Two-piece cartons

- tray/cover (cover outside)
- cover/tray (cover inside)

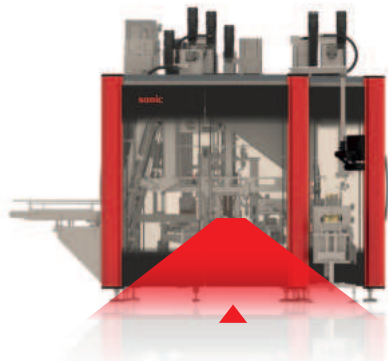

We would be happy to work with you in developing a packaging concept that is tailored to your specific requirements.

Quality “Made in Germany”

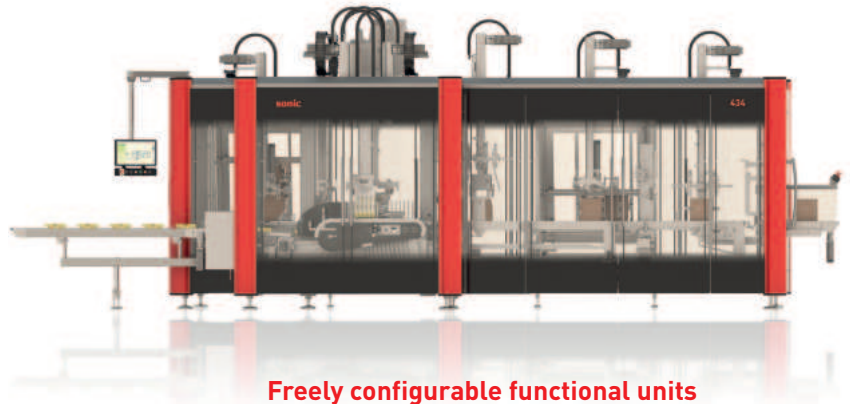

SOMIC combines competence and expertise in corrugated and paperboard packaging. From development and the in-house production of top-quality components through to extensive testing of the finished machines with original products: SOMIC offers maximum reliability during every project phase.

Proven technology – radically rethought:

Flexibility, efficiency, and ergonomics in unexpected dimensions

Cartoning or case packing in line

Freely configurable functional units

SOMIC has always stood for reliable, durable packaging technology with a compact footprint that solves demanding packaging tasks. Our development team has once again improved the trusted technology and taken it to the next level.

The direct line to all carton shapes

The new side-mounted grouping unit enables a cartoning process that runs in a direct straight line. This offers enormous layout advantages:

Outstanding modular flexibility

The functional units can be individually adapted to your desired format ranges, giving your packaging machine a customized, future-proof design.

Highly efficient format changes

The maximum degree of automation and improved accessibility to all areas of the machine enable format adjustments that are up to 70% faster.

Superior ergonomics and optimum use of space

Machine-height safety doors with 180° opening allow full use of the space around the machine. Furthermore, the new frame construction provides ideal ergonomic conditions for format adjustments, cleaning, and maintenance work.

Improved working conditions

There is now a combination of control and supply cabinet. By moving noisy components to a separate, insulated supply cabinet, the machine is now even quieter. Necessary maintenance work is also significantly simplified.

In addition to these groundbreaking innovations, the standard version of the SOMIC 434 is characterized by additional outstanding equipment and performance features:

- smallest possible, space-saving footprint
- stainless steel frame with integrated electrical installation
- operating status visible from all sides thanks to LED corner lighting

We would be happy to provide you with information on the many possible uses of the SOMIC 434 for packaging your products.

Your all-round carefree package: Because you can always rely on SOMIC

Our commitment to the highest level of reliability and performance does not end with the installation of your SOMIC packaging machine. Our experts are here for you throughout the entire lifetime of the machine. This guarantees the highest performance in daily use.

The complete SOMIC service package includes:

- personal support from qualified helpdesk employees
- short notice spare parts service and online documentation
- training programmes for operators and technicians
- global system diagnosis and remote maintenance
- fast and competent customer service on site
- expert team for extended functions and new formats

Contact us about your specific packaging needs. We will be happy to advise you and create a packaging concept that is individually tailored to your needs.

SOMIC – the Direct Line to Shelf-Ready.

Take the next revolutionary step with us and let us impress you with our new, future-oriented collecting and product mixing concept, based on magnetic levitation. Using contact-free planar technology, SOMIC CORAS offers you unlimited options for grouping your goods. More information at: www.somic-packaging.com/en/coras
